***Landowner Name***  
***Landowner Address***  
***City, State, ZIP***

Dear ***[Enter Name]***:

We invite you to attend a public open house meeting to learn about and provide input on the plans of Sharyland Utilities, L.P. (Sharyland) to file an application with the Public Utility Commission of Texas (PUCT) to construct a new 345 kilovolt (kV) electric transmission line in Hale and Floyd Counties. Some of the preliminary route alternatives presented in Sharyland's open house meetings hosted in August 2013 have been modified. **You are receiving this invitation because your property has been identified as now being crossed by or is in close proximity to these new route alternatives.**

The proposed transmission line will connect new gas-fueled electric generation facilities that will be constructed by Golden Spread Electric Cooperative, Inc. (GSEC) in Hale County to Sharyland's existing electric transmission line in Floyd County. The proposed transmission line will be approximately 55 miles long, depending on the route approved by the PUCT, and will be constructed on a combination of steel lattice and monopole towers in a right-of-way approximately 175 feet wide. Completion of this project will enable the introduction of approximately 928 megawatts (MW) of energy for use by GSEC member cooperatives within the portion of Texas served by the Electric Reliability Council of Texas (ERCOT), as well as other Texas consumers in ERCOT.

**Sharyland invites you to attend the following public open house meeting:**

<p><b>Tuesday, October 15, 2013</b> <b>Anytime Between 4:00 - 7:00 PM CDT</b></p> <p><b>City Hall in the City of Abernathy</b> <b>811 Avenue D</b> <b>Abernathy, Texas</b></p>
--

POWER Engineers, a consulting firm retained by Sharyland, has developed a series of preliminary alternative routes for consideration and one or more of these alternatives may affect you. The purpose of this meeting will be to share information about the current route

alternatives, and to seek input from you and other potentially affected parties for use in refining route alternatives. Please note that the format for this meeting will be “come and go.” As such, there will be no formal presentation so feel free to arrive and depart at your convenience. Detailed information and maps depicting these routes will be on display and discussed with you at the meeting. You are invited to attend and will have the opportunity to meet one-on-one with project representatives of our team, ask questions and provide feedback regarding the proposed route alternatives.

Sharyland is dedicated to developing and routing the proposed line in a manner consistent with the values and culture of all the local communities, as well as the rules and policies of the Texas Utilities Code, the PUCT and ERCOT. **Your input is vitally important to the process.**

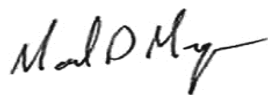

The preliminary alternative routes depicted on the enclosed map are subject to modification, based on information you provide at the meeting, as well as further study. Only one route will ultimately be selected by the PUCT as the location to construct this project, and the final route may or may not affect your property depending on its configuration. We encourage you to attend the meeting and provide your input.

Also enclosed is a questionnaire that we encourage you to fill out in advance and bring to the meeting. Your responses can help Sharyland and the project team identify concerns as well as provide valuable input during the route selection process. If you prefer to wait until you attend the public meeting and view the maps and other project materials before filling out a questionnaire, please feel free to do so.

Should you have any questions concerning this meeting, please contact Sherry Kunka at 866-354-3335 or e-mail your questions to [suhelp@sharyland.com](mailto:suhelp@sharyland.com).

We look forward to seeing you and again, we encourage you to actively participate.

Regards,

A handwritten signature in black ink, appearing to read "Mark D. Meyer". The signature is fluid and cursive, with the first name "Mark" being the most prominent.

Mark D. Meyer  
Senior Project Manager  
Sharyland Utilities, L.P.
