

Improve Your Home. Lower Your Electric Bills.

Residential Energy Efficiency Program

How does the program work?

Sharyland provides financial incentives to Service Providers to make energy efficiency improvements to your home. These financial incentives help offset the cost to you.

What energy efficiency improvements are included?

The most common improvements made by customers include:

- Installation of efficient lighting
- Installation of insulation
- Installation of ENERGY STAR windows
- Sealing of air conditioning ducts
- Replacement of air conditioning units, heat pumps, and water heaters
- Caulking and weather stripping
- Installation of ENERGY STAR refrigerators, clothes washers, and dishwashers

How much will you pay for improvements?

It depends on the improvements made, though some improvements may be made at low or no cost. Contact a Service Provider to find out how much you can save!

How do I find a Service Provider?

The following Service Providers participate in Sharyland's residential program. Also listed are the energy efficiency improvements that each provider installs.
