**Re: Wadsworth to New Oliver to Farmland 345-kV Transmission Line and Southeast to New Oliver to Oliver 115-kV Transmission Line Project**

Dear Landowner,

We invite you to attend a public open house meeting to learn about and provide input on the plans of Sharyland Utilities, L.P. ("Sharyland") and the City of Lubbock, acting by and through Lubbock Power & Light ("LP&L"), to file a joint application with the Public Utility Commission of Texas ("Commission" or "PUC") to construct a new 345-kilovolt ("kV") electric transmission line in Lubbock and Lynn counties, Texas, and a new 115-kV electric transmission line in Lubbock County, Texas. You are receiving this invitation because your property has been identified as being crossed by, or in close proximity to, one or more preliminary alternative route segments that are being considered for the transmission lines.

Earlier this year, the Commission approved LP&L's proposal to transition a portion of its system from the Southwest Power Pool ("SPP") electric grid to the Electric Reliability Council of Texas ("ERCOT") electric grid pursuant to a transmission interconnection plan developed by ERCOT. The Commission determined that, under the terms of its order, the transition is in the public interest. The Commission also designated Sharyland and LP&L to provide the transmission facilities needed to interconnect LP&L's system to ERCOT. This project is an important part of the infrastructure needed to ensure the LP&L system can safely and reliably operate in ERCOT.

The proposed 345-kV transmission facilities will connect the existing Wadsworth Station, located in Lubbock County, to the existing Farmland Station, located in Lynn County, and will be routed through the proposed New Oliver Station, to be located in Lubbock County. The 345-kV transmission line will be approximately 42 to 53 miles in length, depending on the route approved by the Commission. The proposed 115-kV transmission facilities will connect the existing Southeast Station to the existing Oliver Station and will be routed through the proposed New Oliver Station, all of which will be located in Lubbock County. The 115-kV transmission facilities will be approximately 14 to 26 miles in length, depending on the route approved by the Commission. The 345-kV transmission line will be constructed

on a combination of monopole and lattice tower structures within a typical right-of-way approximately 175 feet wide. The 115-kV transmission line will be constructed on monopole structures within a typical right-of-way approximately 60 feet wide, but may vary depending on location and design requirements.

**Sharyland and LP&L are conducting four public open house meetings, as set forth in the table below. To reduce wait times, you are encouraged to attend the meeting associated with the geographic zone in which your property is located. These four zones are depicted on the enclosed Public Meeting Zones Map. However, any landowner affected by any part of the project may attend any of the four meetings, as representatives of Sharyland and LP&L will be prepared to discuss any area of the project at all of the meetings. The information at each meeting will be the same, and there is no need to attend more than one meeting.**

<p>Monday, October 8, 2018 Anytime Between 4:00 – 7:00 PM CDT</p> <p>CenterPointe Event Center 4925 Marsha Sharp Freeway Lubbock, Texas 79410</p> <p>You are encouraged to attend this meeting if your property is located in: <b>Zone 1</b></p>	<p>Tuesday, October 9, 2018 Anytime Between 4:00 – 7:00 PM CDT</p> <p>CenterPointe Event Center 4925 Marsha Sharp Freeway Lubbock, Texas 79410</p> <p>You are encouraged to attend this meeting if your property is located in: <b>Zone 2</b></p>

POWER Engineers, a consulting firm retained in connection with this project, has developed a series of preliminary alternative segments for the proposed transmission lines for consideration. One or more of these preliminary alternative segments may affect you. The purpose of the meetings will be to share information about the alternatives and to seek input from you and other potentially affected parties for use in refining segment alternatives. The format for the meetings will be “come and go.” As such, there will be no formal presentation so feel free to arrive and depart at your convenience. Detailed information and maps depicting these segment alternatives will be on display and discussed with you at the meetings. You are invited to attend and will have the opportunity to meet one-on-one with project representatives, ask questions, and provide feedback regarding the segment alternatives.

Sharyland and LP&L are dedicated to developing and routing the proposed lines in a manner consistent with the values and culture of all the local communities, as well as the rules and policies of the Texas Utilities Code, the Commission, and ERCOT. **Your input is vitally important to the process.**

The preliminary alternative segment depicted on the enclosed maps are subject to modification, based on information you provide at the meetings, as well as further study. Only one route for each of the proposed transmission lines will ultimately be selected by the Commission for the locations of construction, and the final routes may or may not affect your property depending on the configuration. We encourage you to attend one of the meetings and provide your input.

Also enclosed is a questionnaire that we encourage you to fill out in advance and bring to the meetings. Your responses can help Sharyland, LP&L, and the project team identify concerns as well as provide valuable input during the route selection process. If you prefer to wait until you attend the public meetings and view the maps and other project materials before filling out a questionnaire, please feel free to do so.

Should you have any questions concerning the meetings, please call (866) 354-3335 or e-mail your questions to [ccn@sharyland.com](mailto:ccn@sharyland.com).

We look forward to seeing you and, again, we encourage you to participate.

Regards,

A handwritten signature in black ink, appearing to read "Troy Vaughn". The signature is fluid and cursive, with the first name "Troy" and last name "Vaughn" clearly distinguishable.

Troy Vaughn
