Re: Ogallala to Abernathy 345-kV Transmission Line Project

Dear Landowner:

We invite you to attend a public open house meeting to learn about and provide input on the plans of Sharyland Utilities, L.P. (Sharyland) and Lubbock Power and Light (LP&L) to file an application with the Public Utility Commission of Texas (PUCT) to construct a new 345-kilovolt (kV) electric transmission line in Castro, Swisher, and Hale Counties. You are receiving this invitation because your property has been identified as being crossed by, or in close proximity to, one or more preliminary route alternatives that are being considered for the transmission line.

The project is one of several proposed new transmission lines that need to be built as part of an overall effort to move a portion of the LP&L electric system from the Southwest Power Pool (SPP) grid to the Electric Reliability Council of Texas (ERCOT) grid. LP&L has determined that moving a portion of its system to ERCOT provides benefits to its system and to its customers, including access to ERCOT's competitive market. The proposed transmission line will be approximately 50 to 60 miles long, depending on the route approved by the PUCT, and will connect the existing Ogallala Station, located in Castro County, to the existing Abernathy Station, located in Hale County. The project will be constructed on steel monopoles, or steel lattice towers as necessary, in a right-of-way approximately 175 feet wide.

Sharyland invites you to attend either or both of the public open house meetings below:

<p>Tuesday, May 1, 2018 Anytime Between 4:00 - 7:00 PM CDT</p> <p>Nazareth Community Hall 104 North 1st Street Nazareth, TX 79063</p>	<p>Thursday, May 3, 2018 Anytime Between 4:00 - 7:00 PM CDT</p> <p>Abernathy Elementary School Cafeteria 505 7th Street Abernathy, TX 79311</p>
--	--

POWER Engineers, a consulting firm retained in connection with this project, has developed a series of preliminary alternative routes for the proposed transmission line for consideration. One or more of these preliminary alternative routes may affect you. The purpose of the meetings will

be to share information about the route alternatives and to seek input from you and other potentially affected parties for use in refining route alternatives. The format for the meetings will be “come and go.” As such, there will be no formal presentation so feel free to arrive and depart at your convenience. Detailed information and maps depicting these route alternatives will be on display and discussed with you at the meetings. You are invited to attend and will have the opportunity to meet one-on-one with project representatives, ask questions, and provide feedback regarding the route alternatives.

Sharyland and LP&L are dedicated to developing and routing the proposed line in a manner consistent with the values and culture of all the local communities, as well as the rules and policies of the Texas Utilities Code, the PUCT, and ERCOT. **Your input is vitally important to the process.**

The preliminary alternative routes depicted on the enclosed map are subject to modification, based on information you provide at the meetings, as well as further study. Only one route will ultimately be selected by the PUCT as the location to construct this project, and the final route may or may not affect your property depending on its configuration. We encourage you to attend one or both of the meetings and provide your input.

Also enclosed is a questionnaire that we encourage you to fill out in advance and bring to the meetings. Your responses can help Sharyland and the project team identify concerns as well as provide valuable input during the route selection process. If you prefer to wait until you attend the public meetings and view the maps and other project materials before filling out a questionnaire, please feel free to do so.

Should you have any questions concerning the meetings, please call 866-354-3335 or e-mail your questions to ccn@sharyland.com.

We look forward to seeing you and again, we encourage you to actively participate.

Regards,
