Re: Abernathy to Wadsworth 345-kV Transmission Line Project

Dear Landowner:

We invite you to attend a public open house meeting to learn about and provide input on the plans of Sharyland Utilities, L.P. (Sharyland) and Lubbock Power and Light (LP&L) to file an application with the Public Utility Commission of Texas (PUCT) to construct a new 345-kilovolt (kV) electric transmission line in Hale and Lubbock Counties. You are receiving this invitation because your property has been identified as being crossed by, or in close proximity to, one or more preliminary route alternatives that are being considered for the transmission line.

The project is one of several proposed new transmission lines that need to be built as part of an overall effort to move a portion of the LP&L electric system from the Southwest Power Pool (SPP) grid to the Electric Reliability Council of Texas (ERCOT) grid. LP&L has determined that moving a portion of its system to ERCOT provides benefits to its system and to its customers, including access to ERCOT's competitive market. The proposed transmission line will be approximately 30 to 50 miles long, depending on the route approved by the PUCT, and will connect the existing Abernathy Station, located in Hale County, to the existing Wadsworth Station, located in Lubbock County. The project will be constructed on steel monopoles, or steel lattice towers as necessary, in a right-of-way approximately 175 feet wide.

Sharyland invites you to attend the public open house meeting below:

<p>Tuesday, June 5, 2018 Anytime Between 4:00 - 7:00 PM CDT</p> <p>New Deal High School Cafeteria 209 South Auburn New Deal, TX 79350</p>

POWER Engineers, a consulting firm retained in connection with this project, has developed a series of preliminary alternative routes for the proposed transmission line for consideration. One or more of these preliminary alternative routes may affect you. The purpose of the meeting will

be to share information about the route alternatives and to seek input from you and other potentially affected parties for use in refining route alternatives. The format for the meeting will be “come and go.” As such, there will be no formal presentation so feel free to arrive and depart at your convenience. Detailed information and maps depicting these route alternatives will be on display and discussed with you at the meeting. You are invited to attend and will have the opportunity to meet one-on-one with project representatives, ask questions, and provide feedback regarding the route alternatives.

Sharyland and LP&L are dedicated to developing and routing the proposed line in a manner consistent with the values and culture of all the local communities, as well as the rules and policies of the Texas Utilities Code, the PUCT, and ERCOT. **Your input is vitally important to the process.**

The preliminary alternative routes depicted on the enclosed map are subject to modification, based on information you provide at the meeting, as well as further study. Only one route will ultimately be selected by the PUCT as the location to construct this project, and the final route may or may not affect your property depending on its configuration. We encourage you to attend the meeting and provide your input.

Also enclosed is a questionnaire that we encourage you to fill out in advance and bring to the meeting. Your responses can help Sharyland and the project team identify concerns as well as provide valuable input during the route selection process. If you prefer to wait until you attend the public meeting and view the maps and other project materials before filling out a questionnaire, please feel free to do so.

Should you have any questions concerning the meeting, please call 866-354-3335 or e-mail your questions to ccn@sharyland.com.

We look forward to seeing you, and again, we encourage you to actively participate.

Regards,
